// abstract:

This convention ensures an adequate and effective compensation with respect to people harmed by bunker oil pollution. This convention does not apply to damage as is defined under the *CLC convention* (p.27). The ship owner responsible for the incident is liable for the damage, except for the cases described in the convention (e.g. act of war). This convention does not detract from the ship owner's right to restrict his liability, according to national or international legislation (e.g. *CLC convention* p.27; *FUND convention* p.30; *LLMC convention* p.35). An important requirement of this convention is that the ship owners (> 1.000 GT) are obliged to conclude an insurance or another type of financial security to cover their liability.
